

Transformer insulating on components

Insulation Components for construction part

Product names: End Rings , Clamping Rings, Stress ringblanks/clamping rings, Narrow clamping rings and end rings, Spacers, various molded parts & laminated products, Corrugated Boards

Raw material : Transformer board

Special: Highest mechanical and electrical strength

Product Size: The products can be produced according to the drawing provided by customer.

Technical Standards: JB/T8318-1996

Packaging: The inner packing is sealed by plastic film with outer paper carton.

Storage: Product shall be placed on wood frame in case of distortion; When the product is not in use , do not open the plastic film . Please seal the plastic film after use in case of moisture.

Transformer insulating components

Hands-Molded Special Shape Components

Product names: Bushings, Tubes, Fan-angle, Square Tubes, Uchannels, Waves, U-shape rings, Segments of Angle Rings, Edge-Insulating Angle Rings, Segments of Angle Caps, Edge-Insulating Angle Caps

Raw material: Unbleached sulphate pulp

Special: Highest mechanical and electrical strength

Product Size: The products can be produced according to the drawing provided by customer.

Technical Standards: JB/T8318-1996

Packaging: The inner packing is sealed by plastic film with outer paper carton..

Storage: Product shall be placed on wood frame in case of distortion; When the product is not in use, do not open the plastic film. Please seal the plastic film after use in case of moisture.
